

GRP Construction Site Tripod PRO

Masts & stands

Article No.: 1410000339

17

KG

Description

The SETO GRP stands witness to the knowledge that matters at the site: Light weight, easy setup and safe operation, even with gloves, were the key development goals. This is reflected in thoughtful details such as the extremely robust components made of die-cast aluminum, an integrated spirit level for exact leveling or the intelligent extraction protection for the push rods.

Product Highlights

- Robust and ultra-light
- Pinch protection (spacer between the segments) and pull-out protection (push rods cannot fall out)
- Spirit level and adjustable tripod leg for precise vertical alignment
- Enables glare-free work due to the large mounting height

Technical Specifications

General Data

Attribute	Value	Unit
Model	CONSTRUCTION GRP TRIPOD PRO	
Dimensions (Transport)	1920 x 290 x 250	mm
Dimensions (elevated)	4618 x 1620 x 1435	mm
Height	4,6	m
Weight	17	kg
Adaption	Bolt receiver	
Feature	Bubble level	
Segments	3
