Description

* Modular GRP tripod system with quick-lock adapter for container corners

*

The ****SETO CONTAINER MAST**** is the ideal solution for applications requiring stability, flexibility and quick deployment. The high-strength, corrosion-resistant GRP tripod was specially developed for attachment to ISO container corners and can be assembled in seconds without tools thanks to the integrated Quick-Lock foot adapter.

Whether as a lighting mast for mobile lighting units, an antenna carrier for communication solutions or a sensor platform for measurement and monitoring technology, the ****SETO CONTAINER MAST**** offers maximum modularity and versatility. It can be optionally equipped ex-works with powerful LED luminaires from SETOLITE, but can also be used as a universal carrier platform for customer-specific equipment.

Product Highlights

- Temporary deployment locations (e.g. at authorities and organisations with security tasks)
- Construction site and infrastructure lighting
- Mobile communication and measurement technology
- Railway operations, disaster control, industrial plants
