

## SETO FLASHLIGHT DOMINATOR 7000 RC

### Other products

Article No.: **1410001201**

### Description

With the **\*\*SETO FLASHLIGHT DOMINATOR 7000 RC\*\***, SETOLITE has, for the first time, combined the light output of a spotlight with the compact size of a torch. Until now, a light output of over 1,000 lumens had been the preserve of significantly larger spotlights with extensive cooling surfaces. However, the high-performance LED and the lamp body, specially developed for efficient heat dissipation, now enable a torch to deliver such performance levels continuously (for up to twelve minutes).

In addition, the **\*\*SETO FLASHLIGHT DOMINATOR 7000 RC\*\*** features a focusing system that allows the beam to be adjusted continuously between a narrow spotlight and a wide floodlight. This provides a light suitable for a wide range of applications, delivering an exceptionally good and even beam pattern when required, particularly over long distances and also at medium ranges. The light is compact and, weighing barely more than a kilo, remains light and easy to carry without the limitations of a battery-powered spotlight.

Convenience features such as the carrying strap and a battery level indicator make it clear that the **\*\*SETO FLASHLIGHT DOMINATOR 7000 RC\*\*** torch was not only designed for outdoor use, but that the focus was also very much on long-term use and safe handling. The high-power charging station enables rapid charging at any time via fast charging. Should time be short, the battery grip can also be swapped out in the field at any time and then charged later.

### Product Highlights

- Spotlight-level light output
- Adjustable brightness levels (high, medium, low)
- Continuously adjustable focusing system: from a tightly focused searchlight beam to broad area illumination
- Transport case, USB-C charging cable, 230 V power adapter, and 12 V/24 V vehicle charging adapter included
- Impact-resistant and weatherproof
