KG

Description

Developed by SETOLITE LIGHT TARGET MODULE be reduced for glare lighting of night construction sites, for example. B. on motorways, before the individual lighting elements of the ALDEBARAN® 360 GRAD FLEX mounted. A motorist can therefore hardly see inside even in very bright light source, and therefore the site happen without irritation, while site personnel can still perform all the necessary work in the lit work area of ??the construction site at full light output. The photometric measurement of the 'ALDEBARAN® 360 GRAD FLEX LED 960' in the Federal Highway Research Institute (Federal Highway Research Institute) has shown that the light with the fitted 4 light-directing MODULES the high requirements for an anti-glare illumination of Arbeitsstellen- and transport area in a pitch range of 15° to 25° to suit.

Product Highlights

- Glare-free large area lighting
- bast checked
