Description

Save cost, space and weight with the new SETO Crane Frame 'SLIM'.

In comparison with common frames the 'SLIM' version of the SETO Tower Crane Frame is especially optimized for transport in regards to measurements and weight.

To stay compatible with most types of tower cranes the underlying characteristics of the SETO Crane Frame have been kept.

But the execution in two separate parts and different mounting points for the floodlight enable much more convenient measurements and therefore more efficient transport processes.

Product Highlights

- Universally suitable for most cranes
- Additional protection with socket pins with split pins
- Weatherproof
- High quality workmanship, designed for heavy use
