LUMEN

Description

The SETO WORKLITE-MINI is an extremely versatile luminaire that can be used both as a work luminaire and in the outdoor area. Its handy size allows it to be used effectively in various situations and, thanks to its clever features, it can be perfectly adapted to individual lighting requirements. Equipped with two brightness levels (50 and 100 percent) in all three light colours (warm, cold and neutral white) as well as a red SOS flashing light, it provides the right light in every situation.

A magnet integrated into the bracket allows the SETO WORKLITE-MINI to be attached to ferrometal surfaces. In addition, the luminaire can be rotated by 90° via the bracket to adjust the angle of illumination. Thanks to a 6 mm threaded hole in the bracket, the luminaire can also be mounted on a tripod. With all these options, the SETO WORKLITE-MINI offers maximum flexibility for placement and positioning in different environments.

Product Highlights

- Different brightness levels and light modes adjustable
- IPX6 protected (water protection for brief immersion)
- Continuously 90° swivelling perfect adjustment where light is needed
- Magnet at the base
- Can be used as a powerbank
- USB-C charging cable included in the scope of delivery
- 6 mm thread for use with a tripod

Technical Specifications

General Data

Attribute	Value	Unit
Dimensions	99,5 x 92,5 x 31,5	mm
Weight	0,186	kg
Light Functions	2 brightness levels (cw/nw/ww), red SOS-Blink	
Angle Adjustment	90° swivelling	

Lighting Data

Attribute	Value	Unit
Luminant	36 cold white and 25 warm white LEDs (SMD)	
Luminous Flux	400 - 820	lm

Electrical Data

Attribute	Value	Unit
Protection Class	IPX6	
Operating Time (High Level)	1:30 - 1:40	h

Technical Specifications (cont.)

Electrical Data

Attribute	Value	Unit
Operating Time (Low Level)	2:20 - 4:00	h
Charge Time	2 - 3	h
Battery	18650 Li-Ion, 3,7 V, 2.000 mAh
