REAL-LUMEN

Description

Developed for demanding environments, the SETO LED SNAKE PROFESSIONAL has a high light output and a long service life. Simple installation and the option of connecting up to 100 metres in a chain allow flexible and fast use on site, e.g. for illuminating long corridors, stairwells or lift shafts, in tunnels and in mining. Thanks to the high lumen output (1,300 lm/m), an installation height of up to 18 metres is possible. You are also safe in the event of a power failure: the Safety Glow, which then starts automatically, illuminates the construction site for up to two hours.

The SETO LED SNAKE PROFESSIONAL rope light has a double silicone and PVC sheath that provides excellent protection against chemicals and makes it V-0 flame retardant.
